newborn throats
at $t=0$
birth
separation
born apart
perturbation
outward, $\varepsilon > 0$
inward, $\varepsilon < 0$
collapse
a black hole
inflation
open, anti-trapped, growing
GW: Schwarzschild ringdown
GW: none
born close
relative sign
like signs: repel
scattering
recede, both throats inflate
GW: no burst
opposite signs: attract
the race
short d, small p
merger
one horizon around both
GW: one burst, no chirp
large p
plunge
merged core, no MOTS
GW: one burst at contact
otherwise
inflation
both throats inflate
GW: one burst at the encounter
